

Quiz: GPT-4o & Meta Llama 3

◆ Section A: Multiple Choice Questions (MCQs)

1. GPT-4o is developed by which organization?

- ☐ A. Meta
- ☐ B. Google
- ☐ C. OpenAI
- ☐ D. Microsoft

👉 **Answer: C**

2. What does the “o” in GPT-4o represent?

- ☐ A. Optimized
- ☐ B. Omni (multimodal capability)
- ☐ C. Open
- ☐ D. Original

👉 **Answer: B**

3. Meta Llama 3 is developed by:

- ☐ A. OpenAI
- ☐ B. Meta
- ☐ C. Amazon
- ☐ D. IBM

👉 **Answer: B**

4. Which model is open-weight (available for developers to use and modify)?

- ☐ A. GPT-4o
- ☐ B. Llama 3
- ☐ C. Both
- ☐ D. None

👉 **Answer: B**

5. GPT-4o supports which type of inputs?

- ☐ A. Text only
- ☐ B. Text + Image + Audio
- ☐ C. Image only
- ☐ D. Code only

👉 **Answer: B**

◆ **Section B: Conceptual Questions**

6. What is GPT-4o mainly known for?

👉 Real-time multimodal AI (text, image, audio interaction)

7. What is Meta Llama 3 mainly used for?

👉 Open-source LLM applications like chatbots, research, and enterprise AI

8. What is the key advantage of Llama 3 over GPT-4o?

👉 Open weights, customizable, can be self-hosted

9. What is the key advantage of GPT-4o over Llama 3?

👉 Better multimodal capabilities and real-time interaction

◆ **Section C: Scenario-Based Questions**

10. You want to build an internal chatbot without sending data to external APIs. Which model is better? Why?

👉 Llama 3 – because it can be self-hosted and ensures data privacy

11. You are building a voice assistant that understands speech and responds instantly. Which model is suitable?

👉 GPT-4o

12. Your company wants a customizable AI model for domain-specific training. Which would you choose?

👉 Llama 3

◆ **Section D: Advanced Questions**

13. What does “multimodal AI” mean in GPT-4o?

👉 Ability to process multiple data types (text, audio, image)

14. What is “open-weight model”?

👉 Model weights are publicly available for modification and deployment

15. Name one real-time use case of GPT-4o.

👉 AI voice assistants / real-time translation

16. Name one real-time use case of Llama 3.

👉 Private enterprise chatbot / on-prem AI system

◆ **Bonus Rapid-Fire**

- GPT-4o → Multimodal + real-time
- Llama 3 → Open + customizable
- GPT-4o → API-based
- Llama 3 → Self-hosted possible
